PRILOGA 2

Kaj je pravična trgovina?

Kaj je pravična trgovina?

Pravična trgovina je trgovinsko partnerstvo, ki temelji na dialogu, preglednosti in spoštovanju ter si prizadeva za večjo pravičnost v mednarodni trgovini. Prispeva k trajnostnemu razvoju z zagotavljanjem boljših trgovinskih pogojev in osnovnih pravic za prikrajšane proizvajalce in delavce, zlasti v državah svetovnega juga. Organizacije pravične trgovine ob podpori potrošnikov dejavno sodelujejo pri podpori proizvajalcem, ozaveščanju in mnenjskih kampanjah za spremembo pravil in praks konvencionalne trgovine na mednarodni ravni.

OPREDELITEV POJMA FINE

"Fair Trade is a trading partnership, based on dialogue, transparency and respect, that seeks greater equity in international trade. It contributes to sustainable development by offering better trading conditions to, and securing the rights of, marginalized producers and workers – especially in the South. Fair Trade organizations have a clear commitment to Fair Trade as the principal core of their mission. They, backed by consumers, are engaged actively in supporting producers, awareness raising and in campaigning for changes in the rules and practice of conventional international trade. They can be

recognised by the WFTO logo.

Fair Trade is more than just trading: it proves that greater justice in world trade is possible. It highlights the need for change in the rules and practice of conventional trade and shows how a successful business can also put people first."

This is a definition agreed by FINE, in 2001. FINE was an informal coalition of main Fair Trade organizations, including Fairtrade International, WFTO (at that time still IFAT, the International Federation of Alternative Trade), NEWS (the Network of European World Shops) and EFTA (the European Fair Trade Association). Since then, NEWS has disappeared and been integrated into WFTO-Europe. EFTA is also a member of WFTO and WFTO-Europe.

Pravična trgovina spodbuja pravično gospodarstvo, ki temelji na sodelovanju in enakopravnih odnosih med udeleženci. Pravična trgovina si prizadeva za spodbujanje pravičnejših in bolj trajnostnih poslovnih praks, ki spodbujajo družbeno, gospodarsko in okoljsko pravičnost ter pravičnost na podlagi spola.

Mednarodnih načel pravične trgovine je 10:

Area of a Circle

Let r be the radius of the circle and C be the circumference.

Divide the circle into n sectors.

Rearrange the sectors to form a shape resembling a parallelogram.

The base of the parallelogram is the circumference C .

The height of the parallelogram is the radius r .

The area of the parallelogram is $A = \frac{1}{2} C r$.

Since the area of the circle is equal to the area of the parallelogram, we have:

$$A = \frac{1}{2} C r = \frac{1}{2} (2\pi r) r = \pi r^2$$

Circumference of a Circle

Let r be the radius of the circle and A be the area.

Divide the circle into n sectors.

Rearrange the sectors to form a shape resembling a parallelogram.

The base of the parallelogram is the circumference C .

The height of the parallelogram is the radius r .

The area of the parallelogram is $A = \frac{1}{2} C r$.

Since the area of the circle is equal to the area of the parallelogram, we have:

$$A = \frac{1}{2} C r$$

Rearrange the equation to solve for C :

$$C = \frac{2A}{r} = \frac{2(\pi r^2)}{r} = 2\pi r$$
